PROJECTS

Netflix Clone | App Link | Source Code **July 2025**

- This project is a simplified **Front-End Clone of Netflix.**
- It uses the **TMDb MovieDB API** to fetch movies,search for movies and display list of movies.
- Supports **authentication** by allowing only logged-in users to play and watch movies/Web Series.
- Automatic **data updates** when new movies and shows added.
- Technologies Used : **HTML5, CSS3, React, React-Youtube, API, Firebase**.

Amazon Clone | App Link | Source Code **July 2025**

- Built a fully responsive Amazon homepage clone using **HTML5 and CSS3** to replicate real UI layout and styling.
- Implemented a structured **panel section** with links to deals, services, and product categories.
- Developed a product showcase grid using **Flexbox and media queries** for dynamic responsiveness across screen sizes.
- Created a multi-section footer mimicking Amazon's layout with **hover effects and dark theme styling.**
- Technologies Used : **HTML5, CSS3, FontAwesome.**

POSITIONS OF RESPONSIBILITY

NSS Management and Photography Team **October 2022 – September 2024**

- Managed photography coverage of events, creating visual content for reports and campus publications.
- Collaborated with faculty and peers to organize campus-wide NSS activities with 100+ student participation.
- Led the planning and execution of NSS community service events, including cleanliness drives, health camps, and educational sessions in local schools.
